Projects

REDORANGE

RedOrange is a globally networked full-service government contractor that works predominately with federal government agencies in the US, UK and EU. We developed a portfolio site for them and further integrated a Payment Gateway – Payeezy with SALT and HMAC Encryption.

Tech Stack - HTML5, CSS3, Bootstrap, JS, PHP, Payment gateway API integration

EXPENSE TRACKER

The Expense Tracker is a web application designed to empower users with efficient expense management. Built using React, it offers a user-friendly interface for adding, categorizing, and tracking expenses. It has features like customizable categories, data visualization, and budget monitoring.

Tech stack - React.js, CSS3, HTML5.

VALUE1

A revenue sharing platform, where for every monetary transaction you do (subscription, shopping etc.), a cashback of the shared revenue will be given in the form of gold.

Tech Stack - React.js, Node.js, Express, CSS3, AWS Cognito, Amplify, Route53, EC2.

Achievements

TATA CONSULTANCY SERVICES

- Received Best employee of the month December'22 and February '23.
- Single handedly oversaw the bookkeeping between the COD accounts.
- Single handedly analyzed thousands of Customers data to locate and rectify the issue in the order and refund Flow.
